

N. Mohammad Lala Khan

+91-8686130473 | nayancheruvumohammad@gmail.com | [LinkedIn](#)

Professional Summary

- Results-driven **Azure Data Engineer & Power BI Developer** with **4+ years of experience** in Data Analytics, Business Intelligence, and Data Engineering. **PL-300 & DP-700 Certified**, with expertise in **Power BI, Microsoft Fabric, PySpark, SQL, Snowflake, JSON, Azure Databricks, Azure Data Factory (ADF), Azure Synapse Analytics, DAX, Power Query, Advanced Excel, and Python**.
- Extensive hands-on experience in designing and developing **end-to-end ETL/ELT pipelines**, data modeling, semantic models, Lakehouse architecture, and scalable data solutions using **Microsoft Fabric, PySpark, Azure Data Factory, Azure Synapse Analytics, AWS Glue, and Amazon S3**, enabling reliable and high-performance analytics.
- Strong expertise in building interactive **Power BI dashboards** with advanced **DAX**, KPI development, Row-Level Security (RLS), performance optimization, drill-through analysis, and data visualization to deliver actionable business insights for enterprise stakeholders.
- Delivered analytics and data engineering solutions across **Telecom, Healthcare, Retail, and Semiconductor domains** by designing scalable ETL/ELT pipelines, building Lakehouse architectures, and developing enterprise BI solutions using Azure and Microsoft Fabric technologies.

Skills

- Data Engineering:** Azure Databricks, Microsoft Fabric, PySpark, Azure Data Factory (ADF), Azure Synapse Analytics, ETL/ELT Pipelines, Lakehouse, Delta Lake, Data Pipelines
- Power BI:** Dashboard development, Report Creation, Power Query, DAX, Power BI Service
- Databases:** SQL Server, Azure Synapse Analytics
- Data Modelling:** Star Schema, Snowflake Schema, Data Warehousing, Data Transformation
- Programming Languages:** Python, PySpark, SQL, DAX, Power Query (M)
- Visualization Tools:** Power BI, Tableau (Basic Knowledge)
- Cloud Platforms:** Microsoft Azure, Microsoft Fabric, Amazon Web Services (Amazon S3, AWS Glue)
- AI Tools:** Microsoft Copilot for Power BI (AI-assisted DAX, data modeling, insights generation)

Professional Experience

Associate Visualization Specialist (Data Engineer)/ Azure Data Engineer

Bristlecone India Limited | Client: Skyworks Solutions (Semiconductor Supply Chain)

[June 26 – Present]

- Develop and maintain scalable data engineering solutions using Azure Databricks, Microsoft Fabric, PySpark, Azure Data Factory (ADF), and Azure Synapse Analytics to ingest, transform, and process enterprise data for analytics and reporting.
- Design and optimize **ETL/ELT pipelines**, leveraging **Fabric Lakehouse**, Data Factory pipelines, and PySpark notebooks to deliver high-quality, analytics-ready datasets.
- Build and enhance **Power BI semantic models and dashboards** by integrating data from multiple enterprise sources, enabling reporting across procurement, inventory, manufacturing, logistics, and supply chain operations.
- Develop reusable **PySpark** transformations for data cleansing, validation, aggregation, and performance optimization on large-scale datasets within Microsoft Fabric.
- Implement CI/CD practices using Git, GitHub, and Azure DevOps, managing source control, deployment pipelines, versioning, and automated release processes for Microsoft Fabric and Power BI solutions.
- Develop and debug PySpark notebooks, SQL scripts, and configuration files using Visual Studio Code (VS Code), collaborating with cross-functional teams through Git-based workflows.

- Worked with **Microsoft Fabric Lakehouse** and **PySpark** notebooks to perform data cleansing, transformation, aggregation, and optimization, creating analytics-ready datasets for downstream Power BI semantic models and reports.
- Utilized **Azure Synapse Analytics** and SQL for data integration, querying, and performance optimization, enabling scalable reporting solutions across multiple business domains.
- Collaborate with business stakeholders, data architects, and analytics teams to translate business requirements into scalable data solutions while ensuring data quality, governance, security, and performance.
- Optimize SQL queries, monitor pipeline execution, troubleshoot data issues, and implement best practices for reliable and efficient enterprise data platforms.

Tata Consultancy Services LTD | Bengaluru, Karnataka Projects

[Mar 22 – Mar 26]

Tata Play | Internal Project

[Apr 23 – Mar 26]

- Developed and deployed interactive **Power BI dashboards** and semantic models using **Power Query, DAX, and Star Schema**, delivering business insights through KPIs such as Revenue, ARPU, Churn Rate, Active Subscribers, and Growth Metrics.
- Designed and implemented scalable **ETL/ELT pipelines** using **Microsoft Fabric, PySpark, Azure Data Factory (ADF), Azure Synapse Analytics, AWS Glue, and Amazon S3** to ingest, transform, and process enterprise datasets for analytics and reporting.
- Built and optimized **Microsoft Fabric Lakehouse** solutions and **PySpark** notebooks for data cleansing, transformation, aggregation, and performance optimization, creating analytics-ready datasets for downstream BI reporting.
- Developed interactive reports with **drill-through, bookmarks, slicers, and Row-Level Security (RLS)** while leveraging **SQL** for data integration and query optimization to support data-driven decision-making and enterprise reporting.

GE Healthcare | Client Project

[Apr 22 – Mar 23]

- Developed and maintained Power BI data models for GE Healthcare by integrating data from medical systems, SQL Server/Oracle, and Excel via Power Query (ETL).
- Collaborated with stakeholders to analyze business requirements and KPIs, translating operational and clinical needs into scalable Power BI solutions that supported data-driven decision-making.
- Designed and delivered interactive dashboards (Service KPIs, Asset Utilization) using Power Query, Power Pivot, advanced DAX, and Power View, enabling insights into operational efficiency and resource utilization.
- Performed complex data modeling (including many-to-many relationships) and optimized DAX calculations, improving report performance by 40% and reducing reporting effort by 50%.
- Implemented static and dynamic RLS and managed Power BI Service deployments, including gateways, scheduled refreshes, and Level-2 support.

Education

Bachelor of Technology | KMM Institute of Technology and science

2015-2019
